

Christmas Joy Tree Skirt

Studio e Fabrics

- Following the instructions on the panel you will end up with a bird that has two legs.
- Trim tree skirt along straight edges.
- Along one edge (on one panel) turn back approximately 1/2". Choose something in the panel that will be easy to match and turn back there.

- On the second panel line up the bird so that it only has one leg.
- Pin along the fold. I used Roxanne Glue-Baste-It to glue the fold down where I wanted it to be. Using the bare minimum of the glue between the pins then setting it with the iron, removing the pins as I went.

- Open the fold and stitch where the fold was. Trim seam to 1/4".
- Finish your tree skirt following the directions on the panel.
