Before You Begin

Read all instructions before beginning project. Do not pre-wash fabrics. Press fabrics with a dry iron on cotton setting before cutting. Sew fabrics with right sides together (RST) unless otherwise noted. Backstitch at the beginning and end of stitching. Seam allowances can be finished using zigzag or serge stitching. Press seams in the direction of arrows.

Note: A printed panel may become slightly skewed during the finishing process. Check if panel is square before cutting by folding the panel so selvages meet. If all edges do not meet, pull firmly from corner to corner until the edges meet. Continue until all corners are square.

1. To make the Apron body, measure $1\frac{1}{4}$ in (3.18 cm) from the top left and top right corners of the $20\frac{3}{4}$ in x $27\frac{1}{2}$ in (52.71 cm x 69.85 cm) panel and make a mark. Measure a straight line from the top left mark to the bottom left corner and cut along that line. Repeat for the right side. Align the Apron Body Corner Template with each top corner, trace and cut (Dia. A).
